

Wheel Cheater

| Size | Part ID |
|--------|------------------|
| 12mm | EJH-WC-SIZE1-M12 |
| 600mm | EJH-WC-SIZE2-M16 |
| 900mm | EJH-WC-SIZE3-M20 |
| 1200mm | EJH-WC-SIZE4-M24 |

Wheel Cheater (Valve Wrench)

The Wheel cheaters are used to assist with opening of wheel valves, which cannot be done by hand.

Ideal for use in confined spaces or working on in-ground or overhead hand-wheels

They are manufactured by forging and bending steel bar then welding on the handle. Hot forged ends provide a stronger product than cast iron or plastic.

They are Australian made in Dandenong Victoria.

We have 4 sizes in the Wheel Cheaters, see table.
